# <section-header>

# The ParkGard Control Center

Control and manage parking spaces individually.

# **The Features**

The ParkGard<sup>®</sup> Control Center does everything you need with virtually unlimited possibilities for integration.

# INTEGRATION E-MAIL / SMS EXCEL REPORTS

## SYSTEM LANGUAGES

# The Features

The ParkGard<sup>®</sup> Control Center does everything you need with virtually unlimited possibilities for integration.

- Easy integration into SW application
- Data transfer in JSON format
- Write/read rights via user levels
- Reserve/lock/blank out
- DI/DO activation (lock gate)

# **PROJECT MANAGEMENT**

- Integrate multiple parking structures • User account control with access to projects
- Public access
- Only rented parking spots visible
- Dashboard with an overview of key control functions and information

### **SCHEDULER**

- Automate recurring actions
- "Lock car park" weekly market
- "Save energy" overnight shut-off
- Events plan and control traffic

### INTEGRATION

- Many connections already in place (gate systems, induction loops, light control etc.)
- Project-specific interface integration
- 3rd party applications can be integrated

### DASHBOARD

• Overview of key information and control functions at a glance • Editable

## SYSTEM LANGUAGES

- Select from among the most common languages, e.g. German, English etc., with OneClick • Additional languages are fast and easy to add
- LOCAL SERVER

E-MAIL/SMS

• Local on-site server

**CLOUD/WEB SERVICE** 

• www.your-parkingsystem.com

• No additional PC necessary

• Access from any Internet-capable device

• Company network completely isolated

• Send notifications to long-term parkers,

• Faults/alarms/maintenance

parkers on holiday and weekend parkers

• Access via internal network or via remote software, e.g. Teamviewer

- Pre-made Excel spreadsheets for evaluating parking statistics

## **DISPLAY (MATRIX LED)**

- Scenario manager
- Max capacity exceeded: Unlock parking spaces
- (e.g. HC/E parking spot)
- Traffic regulation/traffic control
- Changing display: number of parking
- spaces/weather/events/INFO
- Can be edited without 3rd party software

## **EXCEL REPORTS**

- Customer-specific spreadsheets
- (e.g. individual parking areas over a period defined by the user)

# VIRTUAL MACHINE

- Virtual machine on the customer's infrastructure hardware
- Access via internal network or VPN tunnel

# The Software

Perfect control over all parking spaces in real time: The ParkGard<sup>®</sup> Control Center keeps vital information and control functions ready on a dashboard.

The dashboard bundles the most important information and functions into a clear overview. It can also be edited for specific customer requirements.

Meaningful statistics and system evaluations for predefined or custom periods can be retrieved and exported to Excel for further processing with OneClick.

# The Software

Perfect control over all parking spaces in real time: The ParkGard<sup>®</sup> Control Center automatically performs recurring events and offers comprehensive analysis options as well.

The scheduler allows you to have recurring events, such as weekly markets or overnight system shut-offs, performed automatically.

Compare current days, weeks and months to the previous year. Analyses provide a projection based on data from the past, taking into account various conditions.

# The Software

Perfect control over all parking spaces in real time: The ParkGard<sup>®</sup> Control Center gives you and your project maximum flexibility.

Multilingual software. Any user can change the system language for their needs with one click. Additional languages can easily be integrated without a problem.

The system's background layout is customisable and can be an aerial image, a CAD drawing, a 3D drawing etc. .
