

ParkGard

CONTROL CENTER

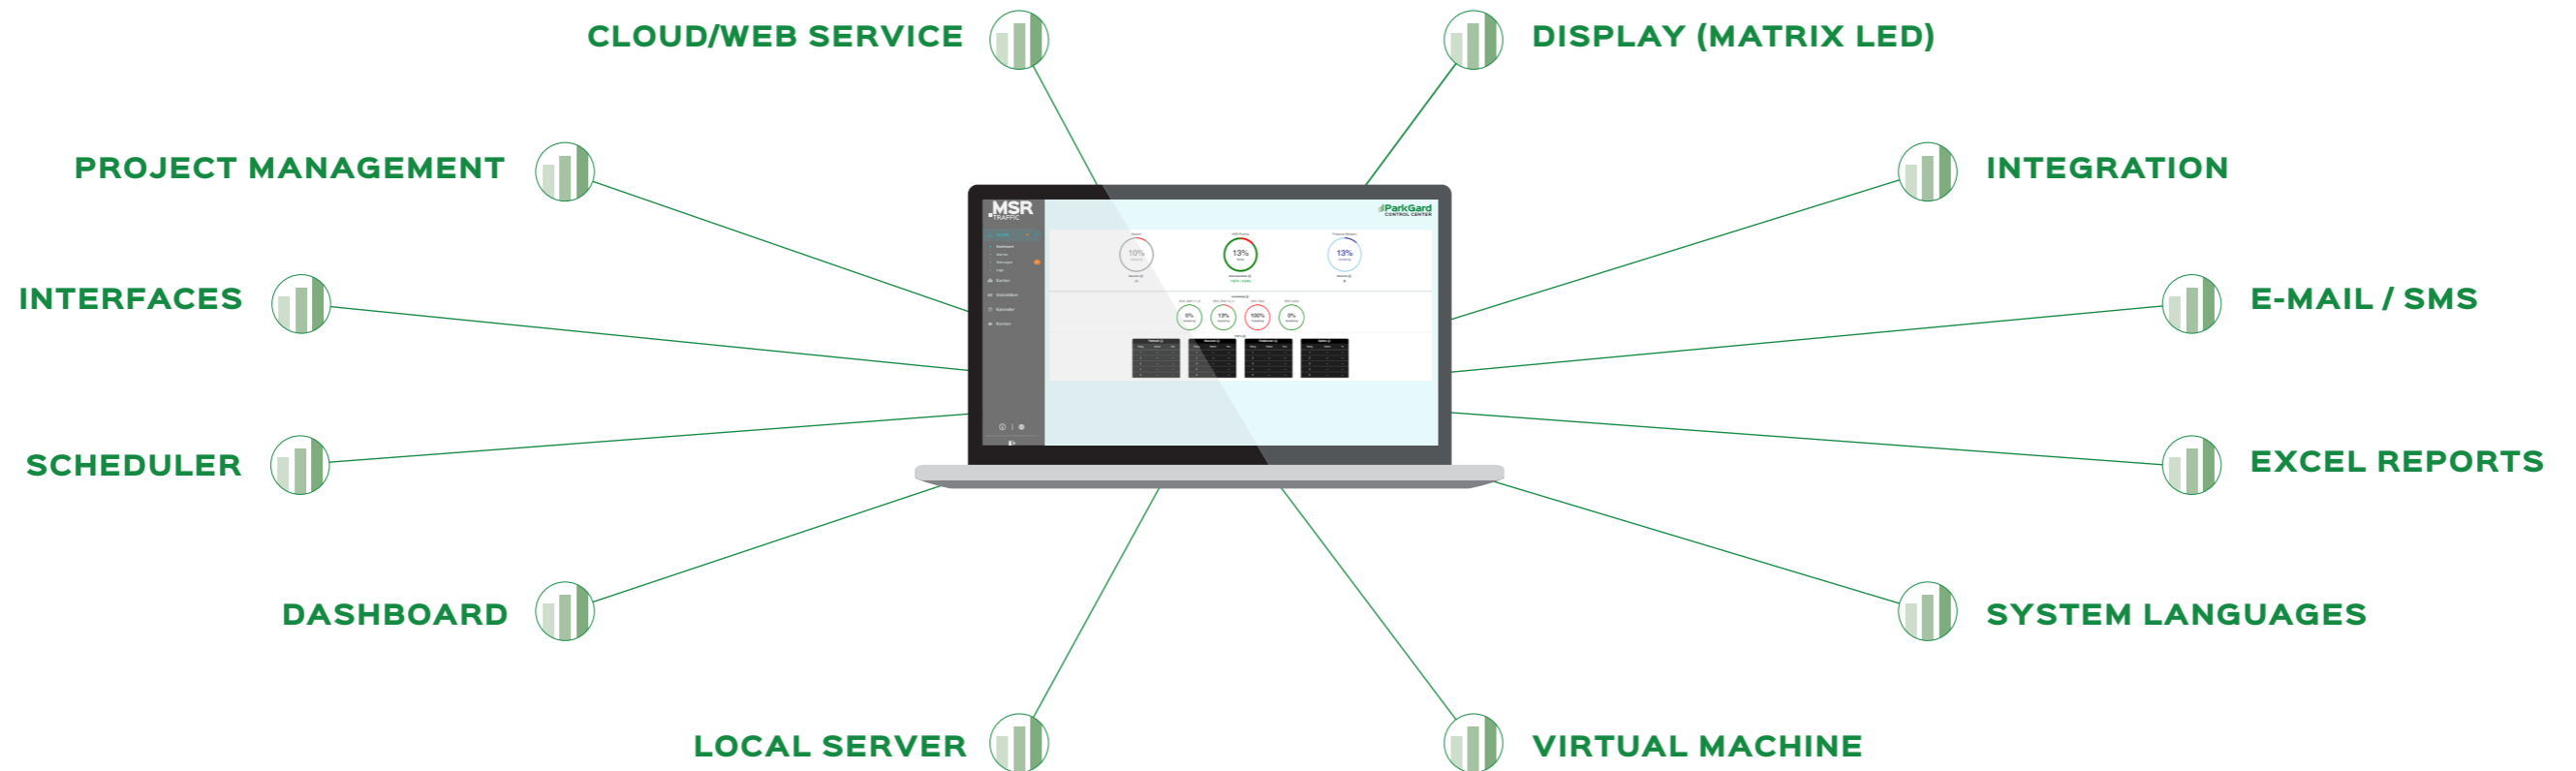

The ParkGard Control Center

Control and manage parking spaces individually.

The Features

The ParkGard® Control Center does everything you need with virtually unlimited possibilities for integration.

The Features

The ParkGard® Control Center does everything you need with virtually unlimited possibilities for integration.

INTERFACES

- Easy integration into SW application
- Data transfer in JSON format
- Write/read rights via user levels
- Reserve/lock/blank out
- DI/DO activation (lock gate)

PROJECT MANAGEMENT

- Integrate multiple parking structures
- User account control with access to projects
- Public access
- Only rented parking spots visible
- Dashboard with an overview of key control functions and information

CLOUD/WEB SERVICE

- www.your-parkingsystem.com
- Access from any Internet-capable device
- No additional PC necessary
- Company network completely isolated

DISPLAY (MATRIX LED)

- Scenario manager
- Max capacity exceeded: Unlock parking spaces (e.g. HC/E parking spot)
- Traffic regulation/traffic control
- Changing display: number of parking spaces/weather/events/INFO
- Can be edited without 3rd party software

SCHEDULER

- Automate recurring actions
- "Lock car park" weekly market
- "Save energy" overnight shut-off
- Events – plan and control traffic

INTEGRATION

- Many connections already in place (gate systems, induction loops, light control etc.)
- Project-specific interface integration
- 3rd party applications can be integrated

E-MAIL/SMS

- Send notifications to long-term parkers, parkers on holiday and weekend parkers
- Faults/alarms/maintenance

EXCEL REPORTS

- Pre-made Excel spreadsheets for evaluating parking statistics
- Customer-specific spreadsheets (e.g. individual parking areas over a period defined by the user)

DASHBOARD

- Overview of key information and control functions at a glance
- Editable

SYSTEM LANGUAGES

- Select from among the most common languages, e.g. German, English etc., with OneClick
- Additional languages are fast and easy to add

LOCAL SERVER

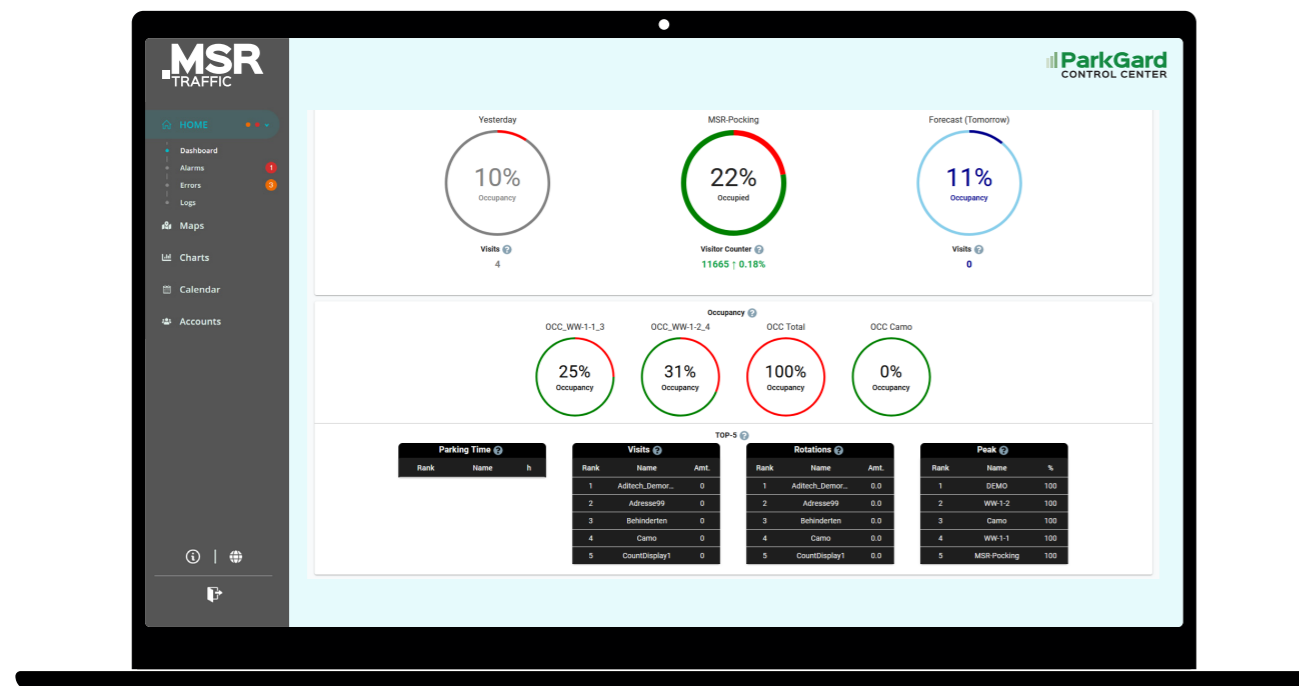

- Local on-site server
- Access via internal network or via remote software, e.g. Teamviewer

VIRTUAL MACHINE

- Virtual machine on the customer's infrastructure hardware
- Access via internal network or VPN tunnel

The Software

Perfect control over all parking spaces in real time: The ParkGard® Control Center keeps vital information and control functions ready on a dashboard.

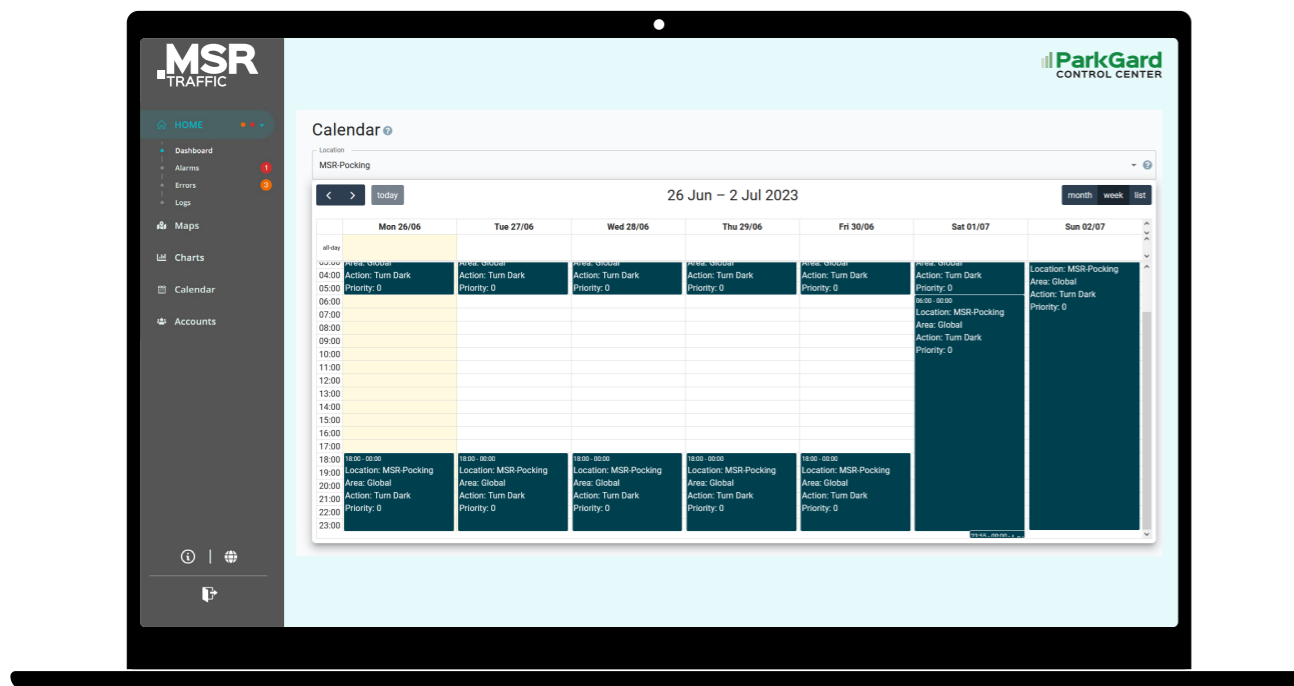

The dashboard bundles the most important information and functions into a clear overview. It can also be edited for specific customer requirements.

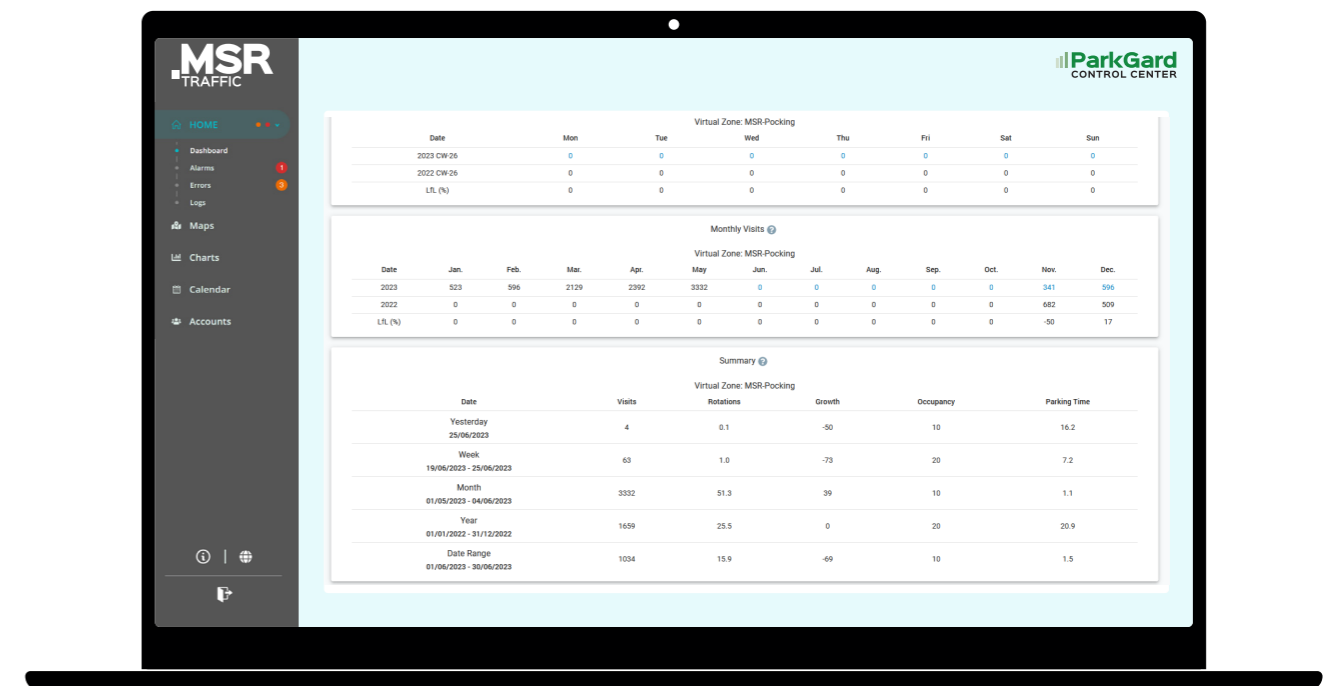

Meaningful statistics and system evaluations for predefined or custom periods can be retrieved and exported to Excel for further processing with OneClick.

The Software

Perfect control over all parking spaces in real time: The ParkGard® Control Center automatically performs recurring events and offers comprehensive analysis options as well.

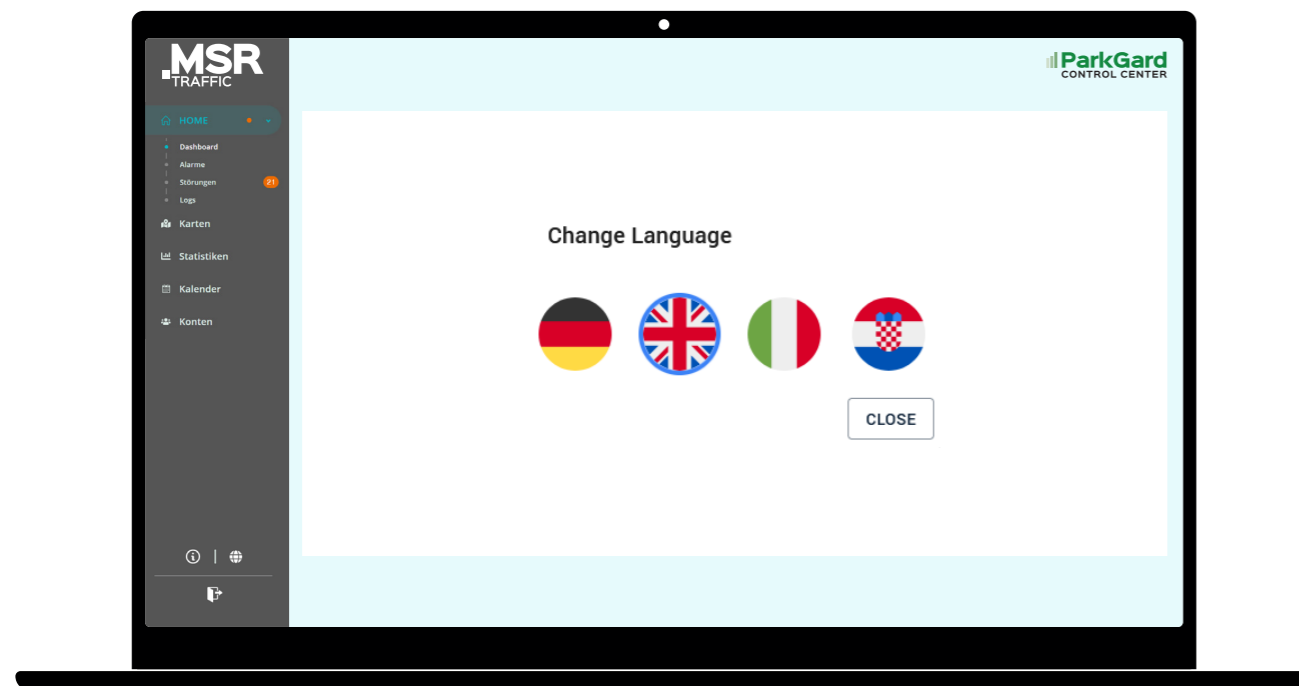

The scheduler allows you to have recurring events, such as weekly markets or overnight system shut-offs, performed automatically.

Compare current days, weeks and months to the previous year. Analyses provide a projection based on data from the past, taking into account various conditions.

The Software

Perfect control over all parking spaces in real time: The ParkGard® Control Center gives you and your project maximum flexibility.

Multilingual software. Any user can change the system language for their needs with one click. Additional languages can easily be integrated without a problem.

The system's background layout is customisable and can be an aerial image, a CAD drawing, a 3D drawing etc. .
