TRAFFIC

Sensors indoor

SONICI

Single space detection - ultrasonic-based

- RGB status LED
- >99 % detection accuracy
- Extremely durable
- Optional audio module
- Low maintenance
- Ceiling mounting

CAMI

Single space detection - camera-based

- RGB status LED
- >97 % detection accuracy
- Extremely durable
- Audio module
- Car number detection and car finder function
- Low maintenance
- Ceiling mounting

FLOWI

Counting - ultrasonic-based

- Extremely durable
- Low maintenance
- Low invest costs
- Ceiling mounting

.MSR
TRAFFIC

Sensors outdoor

MAGNETO

Single space detection - magnetic field-based

- Stand-alone thanks to M2M
- Extremely durable
- >99 % detection accuracy
- Safe against vandalism
- Low maintenance
- Wireless (with battery)
- Floor mounting

CAMO

Single space detection - camera-based

- >99 % detection accuracy
- Extremely durable
- Many features thanks to optional add-ons
- Car number detection and car finder function
- Optional video surveillance
- Low maintenance
- Wall and ceiling mounting

LOOPO

Counting - induction loop

- Management of complex traffic situations
- Continuous improvement of sensor accuracy
- High flexibility and adaptability
- Floor mounting
